Instructions for use

*Let's make things better.*

PHILIPS

INSTALLATION

Positioning of the TV set

- Place TV set on a solid base (e.g. a TV/Video cabinet)
- Leave at least 5 cm around each side of TV set for ventilation to avoid over-heating.
- Do not place TV set near a radiator or other sources of heat.
- Do not place TV set where it can be exposed to rain or excessive moisture.
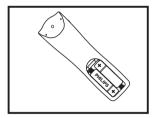

Antenna Connection

- Connect the aerial plug to the antenna socket ⊤ on the backcover.

Mains Connection

- For correct mains voltage, refer to type sticker at the rear of the TV set
- Consult your dealer if mains supply is different.
  Note : This diagram is not representative of the actual plug and socket.
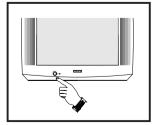

Use of Remote Control

- Insert correct type of batteries into the compartment.
- Replace the battery cover.
  Note : Always remove the batteries from the remote control handset if handset is not used for a long period. This can help prevent damage to handset from possible battery leakage.

Switching on the Set

- Press the main power button to switch on/off the TV. If the set is on standby (indicator is red), press **STANDBY** button on the remote control to switch on set.

1 Mains Power button
Switch mains power on or off.

2 Standby light indicator
Indicate red light when standby mode is activated.

3 Remote Sensor
Aim remote control handset at remote sensor when operating the TV.

4 Volume +/ – button
Adjust sound volume louder/softer.

5 P (Programme) + / – button
Select channel in ascending/descending order.
Note
- You can enter the main menu by pressing **both** the **Volume + / –** buttons at the same time.
- Press **Programme + / –** button to select sub-menu.
- Press **Volume + / –** button to activate sub-menu.

6 AV3 in sockets
Connect to Output sockets of VCR/laser disc player to the **AV3 in** sockets to playback programmes.

7 Headphone socket
Connect headphone jack to socket for personal listening.

8 Antenna socket
Connect the aerial plug to the antenna socket on the backcover.

9 S-Video In socket
Connect the S-VIDEO Output socket (if available) of the VCR to the **S-VIDEO in** socket to enhance picture quality.

10 AV1 In sockets
Connect the Output sockets of the VCR/laser disc to the **AV1 in** sockets to playback programmes.
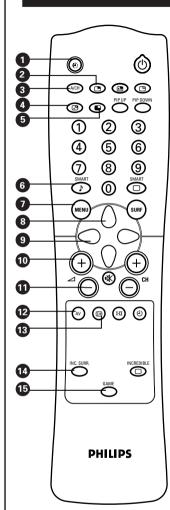

11 AV2 In sockets
Connect the Output sockets of the VCR/laser disc to the **AV2 in** sockets to playback programmes.

12 Monitor out sockets
Connect the **VIDEO out** socket of the TV to the Input socket of VCR to record programmes. To enhance sound of your TV, connect the **AUDIO L** and **R** sockets to an external audio system.

1 SLEEPTIMER
Allows you to select a time period after which the set will switch to standby mode automatically. You can set the timer in steps of 15 minutes from OFF mode up to a maximum of 120 minutes.

2 PIP ON/OFF
Switch on or PIP (Picture in Picture).

3 A/CH (ALTERNATE CHANNEL)
Alternate between last viewed channel and present channel.

4 PIP SWAP
Interchange channel on main screen and subscreen.

5 PIP SOURCE
Allows you to select various external connection for PIP.

6 SMART SOUND
Allows you to select 4 types of sound settings

7 MENU
Allows you to adjust picture and sound settings and activate the features and install the channels automatically.

8 CURSOR UP
Allows you to select the sub-menus.

9 CURSOR LEFT
Allows you to access or adjust the sub-menus.

10 VOLUME +
Increases volume.

11 VOLUME –
Decreases volume.

12 AV
Selects AV1, S-VID1, AV2, AV3, S-VID3 and the last viewed channel respectively. The correct channel must be selected when viewing a playback programme.

13 OSD (On-Screen Display)
Displays :
– channel number.
– remaining time of the sleeptimer.
– programme name.
– information line
– transmission mode.

14 INCREDIBLE SURROUND
Allows you to select incredible surround sound when transmission is in stereo mode.

15 GAME
Allows you to select Video mode as input for video games.

PHILIPS

16 POWER
Switch set off temporarily to standby mode.
(The red light indicator lights up when set is on
standby mode). To switch on set from standby
mode, press and hold button for a few seconds.

17 PIP POSITION
Allows you to move the PIP screen to your
desired position.

18 PIP FREEZE
Allows you to freeze or resume the PIP screen.

19 PIP DOWN
Selects a PIP channel in descending order.

20 PIP UP
Selects a PIP channel in ascending order.

21 DIGIT (0 - 9)
Allows you select a channel. For a 2- digit
channel number, the second digit must be
entered before the " – " sign disappears

22 SMART PICTURE
Allows you to select 4 types of picture settings.

23 SURF
Allows you to select up to a maximum of 10
channels and view quickly the selected channels.

24 CURSOR RIGHT
Allows you to access or adjust the sub-menus.

25 CURSOR DOWN
Allows you to select the sub-menus.

26 CHANNEL + / –
Allows you to select channel in ascending or
descending order.

27 MUTE
Mutes sound. To restore sound, press button
again.

28 TIMER
Not applicable.

29 I-II
Allows you to switch from Stereo to Mono
sound (stereo transmission) or to choose
between language I and language II .

30 INCREDIBLE PICTURE
Allows you to view a more vivid and realistic
picture with better contrast when the "ON"
function is selected.
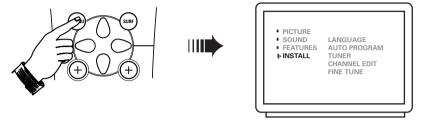

PHILIPS

SMART CONTROLS

Smart Picture

Smart Picture offers you a choice of 4 picture settings – **PERSONAL**, **RICH**, **NATURAL** and **SOFT**.

PERSONAL

RICH

NATURAL

SOFT

• Press **SMART** (Picture) button repeatedly to cycle through the 4 settings to select your desired mode.

Definition of Picture Settings

PERSONAL : Picture settings are set to your preference.
RICH : Emphasize very vibrant colours.
(Suitable for AV mode in brightly-lit room)
**NATURAL** : Emphasize original colours.
SOFT : Emphasize "warm" colours. (Suitable for dimly-lit room condition and gives cinema-like effect when light is switched off)

Smart Sound

Smart Sound offers you a choice of 4 settings – **THEATRE**, **MUSIC**, **VOICE** and **PERSONAL**.

THEATRE

PERSONAL

VOICE

MUSIC

• Press **SMART** (Sound) button repeatedly to cycle through the 4 settings to select your desired mode.

#### Definition of Sound Settings

THEATRE : Emphasize sensation to action.
(Bass and Treble boosted)
PERSONAL : Sound settings are set to your preference.
**VOICE** : Emphasize high tone. (Treble boosted)
MUSIC : Emphasize low tone. (Bass boosted)

Recording programmes from the TV to VCR

• Connect **VIDEO out** sockets of the TV to the Input sockets of VCR to record programmes. To enhance the sound of your television, connect the **AUDIO L** and **R** sockets to an external audio system instead of to the VCR. For mono equipment, connect only the **AUDIO L** (left) socket.

Back of VCR

*video in* ———— *audio in*

External audio system

Playback programmes from VCR/Laser disc player to the TV

• Connect the **S-VIDEO Output** socket (if available) of the VCR to the **S-VIDEO in** socket to enhance the picture quality.
Note : You should not connect the **VIDEO in** socket of the TV if **S-VIDEO in** socket is used.

• Connect the **Output** sockets of the VCR/laser disc player to the **AUDIO L** and **R in** sockets to playback programmes.

Back of VCR

Safety

Disconnect mains plug when :
– the RED light below the screen is flashing continuously.
– a bright white line is displayed across the screen.
– cleaning the TV screen. Never use abrasive cleaning agents. Use a slight damp
   chamois leather.
– there is a lightning storm.
– the set is left unattended for an extended period of time.

<u>**Caution**</u> : Never attempt to repair a defective TV yourself. Always consult a skilled
service personnel.

> **Switch off your TV overnight via the POWER ON/OFF button instead of leaving it on standby. You save energy and at the same time demagnetise the picture tube. A demagnetised picture tube supports good picture quality. When the set is switched on, do not shift, move or turn (e.g. on a swivel base) the set around because an unevenness in colour in some parts of the screen may occur.This can be eliminated by switching off the set by the mains power button . Wait for 20 minutes before switching on again. If symptom still exists, call service.**

Before calling service

Symptom	Check/Action
Colour patch (uneveness)	• Switch off TV by the mains power button. Wait for 20 minutes before switching on again.
No power	• Check TV's AC power cord is plugged into mains socket. If there is still no power, disconnect plug. Wait for 60 seconds and re-insert plug. Switch on TV again.
No picture	• Check antenna connection at rear of the TV. • Possible faulty TV station. Try another channel. • Increase the contrast setting first and then the brightness setting.
Good picture but no sound	• Try increasing the volume. • Check whether sound is switched on.
Good sound but poor or abnormal colour or no picture	• Increase the contrast setting first and then the brightness setting.
Snowish picture and noise	• Check antenna connection at rear of the TV.
Horizontal dotted lines	• Possible electrical interference(e.g. hairdryer, nearby neon lights, etc). Switch off equipment.
'Ghosts' or double image	• Possible poor positioning of antenna. Using a highly directional antenna may improve reception.
TV not responding to remote control handset	• Check life span of batteries. • Aim remote control handset directly at remote control sensor lens on the TV set.
